

Job Title: Sr. Consultant, Business Process Improvement

Job Type: Full Time

Location: Lebanon, NJ

Job Description:

Working independently or as part of a team, Sr. Consultant, Business Process Improvement will analyze processes, identify areas of opportunity, define projects to improve performance and drive those projects to completion. Consultant will manage some or all aspects of client projects, including creating project plans, facilitating project team activities and meetings, ensuring adherence to deadlines and communicating progress and results. Ideal candidate will have a proven track record driving business process improvement initiatives, utilizing Six Sigma, LEAN or related methodologies, to completion.

Qualified candidates will possess the following skills, competencies and background:

- Comprehensive knowledge of Six Sigma, LEAN, Change Management and Project Management
- Exceptional ability to collect, analyze and interpret both qualitative and quantitative data
- Demonstrated proficiency in leading business process improvements delivering significant value to an organization
- Ability to manage multiple ongoing client engagements
- Ability to build strong client relationships
- Excellent communication skills (written and oral)
- Strong presentation skills
- Strong team facilitation skills
- Proficiency with statistical software packages (e.g., Minitab, SPSS) and Microsoft Office applications including Access
- Training and facilitation experience preferred
- Master's degree or above preferred
- 10 years + related corporate experience required
